The Smart Workplace

ISE 2027 | 2 to 5 February | Barcelona, **Hall 3, east entrance**

Presented by FORTÉ & ISE

Today's workplace is defined by how work moves. The Smart Workplace provides clear direction.

- Visit a fully operational, intelligent workplace at ISE 2027 in Barcelona!
- This is a day-in-the-life modern workplace experience you don't want to miss!

In the Smart Workplace, you'll see an integrated workplace experience including the solutions organizations are adopting to enhance productivity. This connected ecosystem, powered by FORTÉ, will help you understand how people, environments and workflows come together to reduce friction and enhance reliability.

Flexible Work Environments

See examples of flexible work environments designed to provide focused, collaborative spaces.

Collaboration is Redefined

Meeting spaces are built on a foundation of reliability, ensuring that every interaction starts smoothly. From that baseline, intelligent workflows enhance the experience, supporting better conversations, clearer decisions, and continuity beyond the room.

Consistent Impact with Broadcast

In the Broadcast space, discover how to deliver messages with clarity, consistency, and impact, strengthening alignment across both internal teams and external audiences.

Workplace Intelligence and Visibility

Behind it all, Workplace Intelligence brings visibility into how the workplace ecosystem performs. Data becomes actionable insight, allowing teams to anticipate issues and continuously improve the experiences.
